Quarto	2
Running Code	2

Introduction

Ceci est un **paragraphe** d'introduction pour prendre en main *Quatro*. L'avantage de *Quatro* est de permettre une meilleure *reproductibilité*, *réutilisation* et *transmission* du code R dans RStudio.

Figure 1: Logo de Openclassrooms

J'apprends ce cours sur le [site d'Openclassrooms](#)

Un **exemple** de Code R est :

```
a<-2  
a*2
```

```
[1] 4
```

Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see <https://quarto.org>.

Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
1 + 1
```

```
[1] 2
```

You can add options to executable code like this

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed).
